Content has been reviewed, revised and updated for 2017-2018 by Kaplan's all-star faculty. Expert Guidance Perfect Score Tips: advice and strategies from students who got a perfect score and top ACT instructors. We know the test: Our Learning Engineers have put tens of thousands of hours into studying the ACT - using real data to design the most effective strategies and study plans. Kaplan's expert psychometricians make sure our practice questions and study materials are true to the test. We invented test prep—Kaplan (www.kaptest.com) has been helping students for almost 80 years, and more than 95% of our students get into their top-choice schools. Our proven strategies have helped legions of students achieve their dreams. The previous edition of this book was titled ACT 2017 Strategies, Practice & Review. The Cellular explosion in the World Marketplace took our small \$50 million a year car telephone business at Motorola and grew it rapidly to over a \$15 billion a year huge enterprise. It was an

amazing ride, and Motorola had some top talent that made it the leader in the field at least in the early years of Cellular. Yes, I indeed was at first one of the engineers and then one of the leaders in this dramatically expanding field. But more importantly, I was around some of the best leadership talent who helped teach me and others to deal with perhaps the business equivalent of riding white rapids down a raging river. The business experience in this book is not just relevant to the Cellular industry, but I believe transfers well to most other businesses - in my opinion. I have the highest admiration for some of those early leaders in Motorola Cellular and our great Industry Partners and learned much from them. And yes I also did learn some knowledge on my own, and often not the easy way. This book is my attempt to share that knowledge with others willing to read it. My purpose? I wish I knew these items at the beginning. It should not take 40 years to learn them. I do understand that beauty is in the eye of the beholder, and that there are perhaps other ways to learn business excellence. But this is the learning I received as I grew rapidly in the Cellular Business explosion. I moved from a low paid starting engineer to a VP in a Fortune 500 Company and then to a Sr. VP in a California startup firm, and then to founding a few small businesses on my own. It has been... a fun ride.... and a tremendous learning experience. And I am now trying to share it with others as openly and honestly as I can. Thank you for reading this, and I indeed do wish you the very best. - Ron Plachno (author) "2 full-length online practice tests"--Cover.

This classroom-tested undergraduate textbook is intended for a general education course in game theory at the freshman or sophomore level. The essays in this volume analyze war, its strategic characteristics and its political and social functions, over the past five centuries. The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present. Makers of Modern Strategy from Machiavelli to the Nuclear Age takes the first part of its title from an earlier collection of essays, published by Princeton University Press in 1943, which became a classic of historical scholarship. Three essays are repinted from the earlier book; four others have been extensively revised. The

rest--twenty-two essays--are new. The subjects addressed range from major theorists and political and military leaders to impersonal forces. Machiavelli, Clausewitz, and Marx and Engels are discussed, as are Napoleon, Churchill, and Mao. Other essays trace the interaction of theory and experience over generations--the evolution of American strategy, for instance, or the emergence of revolutionary war in the modern world. Still others analyze the strategy of particular conflicts--the First and Second World Wars--or the relationship between technology, policy, and war in the nuclear age. Whatever its theme, each essay places the specifics of military thought and action in their political, social, and economic environment. Together the contributors have produced a book that reinterprets and illuminates war, one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past.
