Essentials of Chinese Medicine Mar 14 2021 The modern medical model is gradually shifting from one of biomedicine to one that integrates practices from the physiological, psychological, sociological and medical fields. This growing recognition that people, the environment, ecological conditions and society are all aspects of a united whole has given rise to an emergence of alternative medicine and therapies, many of which are borrowed from traditional Chinese medicine. Volume One systematically introduces the basic theories and the diagnostic methods of Chinese Medicine, providing a concise presentation that is suitable for both teaching and self-study. Use of illustrations throughout also reinforce the theories and facts demonstrated in this valuable resource on the fundamental principles of Chinese Medicine.

Mental Capacity Act 2005 code of practice Jan 12 2021 The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

Introduction to the Hong Kong Basic Law Aug 07 2020 Effective since China's resumption of sovereignty on 1 July 1997, the Hong Kong Basic Law lays down the general policies and system of government for Hong Kong under the "one country, two systems" formula. It guarantees Hong Kong a high degree of autonomy, enshrines the rights and freedoms of residents, and preserves a separate common law system with an independent judiciary. This introduction traces the origins of the Hong Kong Basic Law and the concepts and legal issues that surround it. Drawing on the experience of the first 15 years, it then analyses the content of the Hong Kong Basic Law, especially in relation to Hong Kong's political system, the judiciary, and human rights. Intended especially for students at all levels in law, politics, and other disciplines, this book—the only introductory guide of its kind to the subject—will also appeal to the general reader interested in Hong Kong's experience under "one country, two systems". "Danny Gittings's Introduction to the Hong Kong Basic Law makes a significant contribution to an important subject. It is expressed in reader-friendly terms. The insights that it provides are of value not only to lawyers but also to the general public." —The Hon. Mr. Justice Kemal Bokhary, Permanent Judge of the Hong Kong Court of Final Appeal (1997–2012), Non-Permanent Judge (2012–). "This well-researched and very readable introduction explains the history, practices and future of the Basic Law—Hong Kong's key constitutional document. It also explores how far the Basic Law is able to address the many political and legal issues now facing Hong Kong. The book is suitable for a wide range of readers. Students of Hong Kong law at all levels will find it essential reading. General readers with an interest in Hong Kong's governance will find in it a lucid and accurate guide—and a timely one as the debate about implementing democracy intensifies." —Professor Fu Hualing, Faculty of Law, University of Hong Kong. "Many of us approach law books with trepidation. But Gittings, a legal academic, used to be a journalist and this shows in his ability to make the book accessible to the general reader. [...] The Basic Law will continue to be central to issues facing the city for years to come. This book enables the reader to quickly acquire a much better understanding of them." —South China Morning Post "As Professor Gittings points out in his book, which includes a chapter on what might happen after Hong Kong's 50-year autonomy ends, readability was a key aim. Acronyms are kept to a minimum and details set up neatly and comprehensively in footnotes so that the main text is kept as clean as possible." —Hong Kong Lawyer

Model Rules of Professional Conduct Jan 04 2023 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Principles of Polymer Engineering Rheology Jan 30 2020 Provides the basic background needed by engineers to determine experimentally and interpret the rheological behavior of polymer melts—including not only traditional pure melts but also solutions and compounds containing anisotropic (fiber or disc) or colloidal particles—and apply it to analyze flow in processing operations. Experimental foundations of modern rheology and rheo-optics and the interpretation of experimental data are covered, which also develops the fundamentals of continuum mechanics and shows how it may be applied to devise methods for measurement of rheological properties, formulation of three-dimensional stress-deformation relationships, and analysis of flow in processing operations. Also discusses the structure of polymers and considers rheological behavior in terms of structure. Constitutive equations relating stress to deformation history in non-Newtonian fluids and their applications are discussed. Each chapter presents an overview of the subject matter and then develops the material in a pedagogical manner.
