The quote is purposely repeated throughout because when you are facing decisions and obstacles in your personal and professional lives, these are the words that can matter in those moments. In this book, we will explore the answers to these questions: How many words do I really need to read before I am able to become my best self? Why am I still waiting to begin and why do I always feel like I am not ready? How do I know if I am on my destined path? How do I motivate myself to start taking action in my life? Written in succinct and easy-to-follow language, this guide will help you to understand how little you need to read when you implement this quote instead. Learn ways to become more focused, work smarter, and be able to execute your plans faster than ever. This book will prompt you to think about potential paths that align with you becoming your best self. If you grasp this concept quickly, you will stop reading and get to work right away.

Self Build Simplified Jul 15 2021 Written by "GRAND DESIGNS" Self Build Expert Barry Sutcliffe, this book sets about debunking the myths and revealing the hidden and often surprising secrets of the UK's self build industry. Over its 16 chapters and 550 pages it turns the industry upside down and shakes it until all the rubbish, the unnecessary and the inappropriate falls out. As it does so, it helps to create for the reader, a much clearer and less intimidating picture of what self build is actually all about. Allowing each individual to make informed decisions on "when, if and how" they should consider taking on their own project. In a straightforward, but easy to read style, it explores and explains all the important parts of the process, including: Would a self-build a good idea for you, either now or in the future? - What could you afford to build? - How can you find and buy good quality land at lower prices than most others pay for poorer plots? - How you can save 1,000's by actually designing your own home? - How to give yourselves the best chance of securing planning permission. - What building method would be best for you? - How to manage your project. - How building quickly can save you money. - How to avoid the pitfalls, the traps and the mistakes. The book's author is a well-known and well respected self build expert, with over 30 years of both housing and commercial site management experience. Barry's "no-nonsense" approach has seen him working with "Homebuilding and Renovating" magazine as self-build expert at their live shows. He was also part of Coalition Government's "Self Build Working Group" in 2011, where his ideas and knowledge helped to formulate governments latest UK self-build policy (published in 2012). Over 35 years' worth of unique and invaluable building experience and knowledge has been condensed into this book, with the aim of guiding you, the self builder on to a path where, maybe sooner than you think possible, achieving both your potential and your goals, could become a reality. Whether or not you are involved in the building industry, before you take on a self-build project, you should read this book."
