Reprint of the original, first published in 1861.

Language Use in Interlingual Families Mar 23 2022 This book introduces the way languages are used in Japanese-English interlingual families in Japan and explains what factors influence their language choice, with the aim of arriving at a predictive model of language use. It also proposes a taxonomy of interlingual family types and a typological model of language use.

Intelligent Information and Database Systems Feb 19 2022 The two-volume set LNAI 7802 and LNAI 7803 constitutes the refereed proceedings of the 5th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2013, held in Kuala Lumpur, Malaysia in March 2013. The 108 revised papers presented were carefully reviewed and selected from numerous submissions. The papers included are grouped into topical sections on: innovations in intelligent computation and applications; intelligent database systems; intelligent information systems; tools and applications; intelligent recommender systems; multiple modal approach to machine learning; engineering knowledge and semantic systems; computational biology and bioinformatics; computational intelligence; modeling and optimization techniques in information systems, database systems and industrial systems; intelligent supply chains; applied data mining for semantic Web; semantic Web and ontology; integration of information systems; and conceptual modeling in advanced database systems.

Industrial Use of Formal Methods Jun 25 2022 At present the literature gives students and researchers of the very general books on the formal technics. The purpose of this book is to present in a single book, a return of experience on the use of the "formal technics" (such as proof and model-checking) on industrial examples for the transportation domain. This book is based on the experience of people which are completely involved in the realization and the evaluation of safety-critical system software based. The implication of the industrialists allows to raise the problems of confidentiality which could appear and so allow to supply new useful information (photos, plan of architecture, real example).

Search Engines, Link Analysis, and User's Web Behavior Dec 20 2021 This book presents a specific and unified approach framework to three major components: Search Engines Performance, Link Analysis, and User's Web Behavior. The book can be used by researchers in the fields of information sciences, engineering (especially software), computer science, statistics and management, who are looking for a unified theoretical approach to finding relevant information on the WWW and a way of interpreting it from a data perspective to a user perspective.

WMO Region III/IV Training Seminar on Climate Data Management and User Services Aug 28 2022

An Introduction to Single-User Information Theory Apr 23 2022 This book presents a succinct and mathematically rigorous treatment of the main pillars of Shannon's information theory, discussing the fundamental concepts and indispensable results of Shannon's mathematical theory of communications. It includes five meticulously written core chapters (with accompanying problems), emphasizing the key topics of information measures; lossless and lossy data compression; channel coding; and joint source-channel coding for single-user (point-to-point) communications systems. It also features two appendices covering necessary background material in real analysis and in probability

theory and stochastic processes. The book is ideal for a one-semester foundational course on information theory for senior undergraduate and entry-level graduate students in mathematics, statistics, engineering, and computing and information sciences. A comprehensive instructor's solutions manual is available.

ACARS - A Users Guide Jan 01 2023 Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

Reliability in Procurement and Use Oct 25 2019 Details all the issues and applications of reliability engineering relevant to the use and purchase of equipment. Introduces reliability terminology for the non-specialist. Discusses product procurement based on life cycle cost, the total expenditure of ownership as opposed to merely acquisition, procurement dependability specifications, equipment inspection frequency, optimization of replacement, overhaul tactics and schedules. Explains how to collect, analyze and monitor field failure data in order to build up dependable reliability data banks for future use.

APTIKOM Journal on Computer Science and Information Technologies (CSIT) Vol. 4 No. 3 November 2019 May 01 2020 CSIT (APTIKOM Journal on Computer Science and Information Technologies) Published by APTIKOM & Organized by Aptikom Publisher and Pandawan. CSIT is published three a year, every March, July, and November.

A First Course in Differential Equations with Modeling Applications Jan 27 2020

Straightforward and easy to read, A FIRST COURSE IN DIFFERENTIAL EQUATIONS WITH MODELING APPLICATIONS, 11th Edition, gives you a thorough overview of the topics typically taught in a first course in differential equations. Your study of differential equations and its applications will be supported by a bounty of pedagogical aids, including an abundance of examples, explanations, Remarks boxes, definitions, and MindTap Math - an available option which includes an online version of the book, lecture videos, a pre-course assessment, and more. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Gentrification of Nightlife and the Right to the City Sep 24 2019 In *The Gentrification of Nightlife and the Right to the City*, Hae explores how nightlife in New York City, long associated with various subcultures of social dancing, has been recently transformed as the city has undergone the gentrification of its space and the post-industrialization of its economy and society. This book offers a detailed analysis of the conflicts emerging between newly transplanted middle-class populations and different sectors of nightlife actors, and how these conflicts have led the NYC government to enforce "Quality of Life" policing over nightlife businesses. In particular, it provides a

deep investigation of the zoning regulations that the municipal government has employed to control where certain types of nightlife can or cannot be located. Hae demonstrates the ways in which these struggles over nightlife have led to the “gentrification of nightlife,” while infringing on urban inhabitants’ rights of access to spaces of diverse urban subcultures - their “right to the city.” The author also connects these struggles to the widely documented phenomenon of the increasing militarization of social life and space in contemporary cities, and the right to the city movements that have emerged in response. The story presented here involves dynamic and often contradictory interactions between different anti/pro-nightlife actors, illustrating what “actually existing” gentrification and post-industrialization looks like, and providing an urgent example for experts in related fields to consider as part of a re-theorization of gentrification and post-industrialization.

Use of mobile phones by the rural poor - gender perspectives from selected Asian countries May 25 2022 Mobile phones have been shown (though not uniformly) to positively contribute in various ways to rural development, from reducing information asymmetry, improving functional networks, to increasing access to services and finance. Yet a digital gender divide exists. When contrasted with the fact that women comprise 43% of the worlds’ agricultural labor force, this digital gender divide can inhibit rural development. There is substantial exploration of the digital gender divide in the literature. Yet the answers to questions regarding differential access and use of information and communication technologies are mostly inconclusive. This study tries identify the information needs of the rural poor with gender dissagregated statistics.
