The Professional Diplomat Oct 06 2020 The role of the Foreign Service Officer of the United States altered radically during and after World War II. John Harr, who served as a staff member of the Commission on Foreign Affairs Personnel in 1962 and as Director of the Office of Management Planning in the State Department for four years, describes the changes and the response of the Foreign Service Corps to them. He provides a direct approach to the understanding of the professional diplomat and of the pervasive force of professionalism in modern American society. He also outlines managerial strategy to meet the growth challenge of the future. Originally published in 1969. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Java Performance: The Definitive Guide Apr 11 2021 Coding and testing are often considered separate areas of expertise. In this comprehensive guide, author and Java expert Scott Oaks takes the approach that anyone who works with Java should be equally adept at understanding how code behaves in the JVM, as well as the tunings likely to help its performance. You'll gain in-depth knowledge of Java application performance, using the Java Virtual Machine (JVM) and the Java platform, including the language and API. Developers and performance engineers alike will learn a variety of features, tools, and processes for improving the way Java 7 and 8 applications perform. Apply four principles for obtaining the best results from performance

testing Use JDK tools to collect data on how a Java application is performing Understand the advantages and disadvantages of using a JIT compiler Tune JVM garbage collectors to affect programs as little as possible Use techniques to manage heap memory and JVM native memory Maximize Java threading and synchronization performance features Tackle performance issues in Java EE and Java SE APIs Improve Java-driven database application performance

Douglas County, Nebraska Marriages, 1854-1881 Jul 03 2020 Windsor, Connecticut was one of the three towns that united to form the Colony of Connecticut in the 17th century. A great deal of data concerning Windsor's early inhabitants can be garnered from this work, which is based on records in the possession of the Connecticut Historical Society. By far the largest source transcribed for this publication is the Matthew Grant, or "Old Church," Record, 1639-1681. Comprising the first half of the volume, the Matthew Grant Record consists of several thousand births, marriages, and deaths for Windsor families throughout much of the 17th century. Though not an "official record" of the town, it nonetheless is one of the most important sources of Windsor "vital records" in existence. Various addenda to the Matthew Grant Record are appended to the back of the book. The balance of the volume is made up of a variety of records, each of which has the virtue of placing a particular colonist in Windsor during the 17th or early 18th century, namely: (1) Town Votes, which speak loudly on the methods of town governance and the persons who were assigned to carry out tasks; (2) Lists of Freemen, 1669, 1703; (3) Documents Relating to the Church Controversy of 1669-

1679, which affected towns throughout Connecticut; and (4) A Ratable List of Persons and Estates, 1686, representing the second longest record in the volume and disclosing the real and personal property (with the assessed values) for each property owner in town. This book is also available on our CD Settlers of Augusta County, Virginia.

Advances in Cryogenic Engineering Jul 27 2022 The Second International Cryogenic Materials Conference (ICMC) was held in Boulder, Colorado, in conjunction with the 1977 Cryogenic Engineering Conference (CEC). Special thanks must be given to the University of Colorado for their skillful hosting of these two conferences. Collaboration between the two conferences has been mutually beneficial, providing the materials specialist with insight into new applications and design concepts and the cryogenic engineer with exposure to modern materials accomplishments and potentials. The Proceedings of the 1977 Cryogenic Engineering Conference are published in Volume 23 of *Advances in Cryogenic Engineering*. Both conferences will be held again simultaneously in Madison, Wisconsin, in August 1979. The success and growth of the two International Cryogenic Materials Conferences have led to the formation of an ICMC Board of Directors. The board members will serve a four-year term and include: Chairman, R. P. Reed

(U.S.), R. W. Boom (U.S.), A. F. Clark (U.S.), G. Hartwig (W. Germany), J. W. Morris (U.S.), M. Suenaga (U.S.), K. Tachikawa (Japan), J. Tanaka (Japan), and K. A. Yushchenko (USSR).

Building Strong Banks Through Surveillance and Resolution Aug 23 2019 Since the mid-1990s, economic observers have kept a watchful eye on the financial sector because of its potential to spark economic crises. Banks in particular have come under close scrutiny. This book offers guidance on setting up regulatory and supervisory regimes that can help to prevent crises, and on dealing with turmoil, should a crisis erupt. It contains a collection of essays on a wide range of issues useful to bolstering the banking and financial sector.
